PERGONE

< only 230 mm >

Pergone features:

- very narrow construction (only 230 mm), ideal for e.g. terrace and ground enclosures
- particularly robust and strong manufacture (wire gauge 6-8 mm)
- suitable as noise and wind protection
- different fillings possible (e.g. granite, marble, broken glass and many more)
- extremely weather-resistant
- height measurement customisable in 200 mm steps
- length measurement customisable in 50 mm steps
- maximum size per element (LxHxD): 2500 x 1800 x 230 mm
- **NEW:** heights up to 2400 mm possible

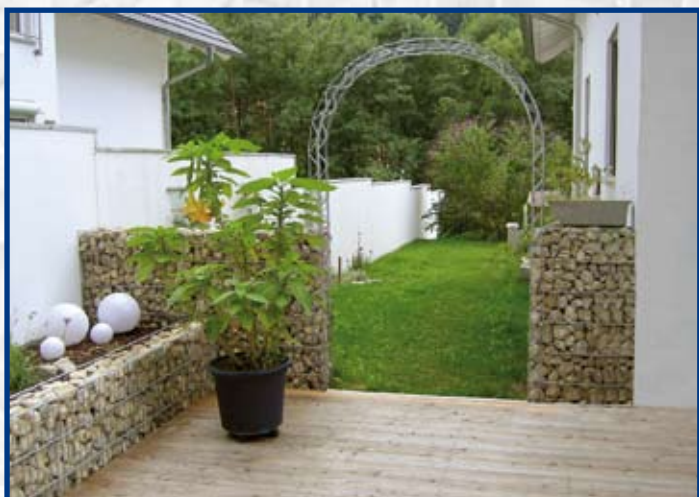

Notice: The elements are supplied without stone filling. The pictures displayed serve merely as examples.

The variable, flexible and robust design feature for gardens, terraces and pergolas

...as variable
as your
requirements.

In combination with an *arcadia*[®] Pergone gate two basic elements are designed into an inviting garden gateway.

further Pergone features:

- different corner solutions without expensive special parts
- wall posts only needed every 2500 mm
- ideal extension possibilities with the **arcadia**[®] twining support system (see separate leaflet)

arcadia[®]

the patented filigree
twining support system
made from steel
